Checklist

Simple Ways To Avoid Mould

- [ ] Open windows as much as possible to ventilate the property

- [ ] Check windows for blown double glazing and replace if possible as this may mean moisture is getting in

- [ ] Wipe off any condensation that's formed on the windows

- [ ] Install an extractor fan in the bathroom, use when having a shower or bath and clean regularly

- [ ] Avoid drying clothes inside as the moisture will evaporate and settle on walls and ceilings

- [ ] Use a dehumidifier to ensure humidity levels are kept below 50%

- [ ] Check the roof, plumbing and walls in case of a leak if damp occurs to avoid mould forming

- [ ] Get a damp survey if unexplained damp appear at the property

- [ ] Paint high moisture rooms with anti-mould paint and remove any mould before re-painting

- [ ] Keep doors shut to avoid moisture escaping from high moisture rooms such as kitchens and bathrooms to avoid damp air circulating the rest of the house
